MID-WEEK ANNOUNCEMENTS 12/9/2020

+++++

Complete information related to COVID-19 is updated regularly [here](#). See COVID-19 Impact on Schools FAQ.

+++++

NEW: DOE-LM (English Learners and Immigrants)

The **LM data reporting window closes Friday, 12/18/20 at 4:00 pm ET**. As of Tuesday morning, 12/8/20, there were 176 corporations, public and non-public, that have reported zero LM data for at least one school.

Important notes regarding LM records found on your Reconciliation Report:

- **Language Changes**: If you have a student who is showing as having a non-EN language, and in reality this student has a Home Language Survey that lists English for all three questions, **this would be an instance for an HLS Amendment form**. Because review of these cases impacts student civil rights and EL services, we are requesting **all HLS Amendments be faxed (317.232.0589) by the morning of Friday, December 11. We will not review new HLS Amendments during the final week of the collection**. If you have sent HLS Amendments and are awaiting approval, you will receive feedback via email by the end of this week.
- **Data Entry Errors**: You may be receiving error messages blocking you from reporting the proficiency level desired; or, it may be asking you to click to choose a criteria but the link isn't active. If you are facing one of these issues, please submit a Help Desk Ticket, detailing the student STN numbers, what you are trying to report, and the reason you are reporting that level. Our data collection team is processing all issues there. If you have already submitted a ticket, you will hear back from the Data Collection team soon.

NEW! Calendar and Attendance Reporting Webinar Recordings

Webinar recordings are now available for the "High-Level Overview of Calendar and Attendance Reporting" from 12/1/2020 and 12/2/2020. The recordings and slides are posted for public and non-public schools in the IDOE Moodle "Data

Exchange Training” course (no enrollment key required).

+++++

NEW: Replacement for Google Data Exchange Community Forum

We have found that since Google changed from Google Plus to Google Currents that we no longer have the capability to allow new members to join our Data Reporting Community Forum. After spending much time trying to resolve this issue without success, we are considering moving our community forum and our announcements to the Moodle Data Exchange Training course. We will not be able to move forward with a change until some time after the first of the new year. We want to make certain that we continue to offer our users a way to collaborate and learn from each other. Until this move is made, the forum will remain open and announcements will continue to be posted.

In the meantime, for those that are unable to join the Google Data Exchange Community, be advised that Mid-Week Announcements are posted to the [Data Reporting Help](#) page each Wednesday. Select the Announcements tile to access both current and historical announcements.

+++++

NEW: Known Issue - Reporting Charter School ID for Accountability

We are aware that Real Time (RT) records are failing when reporting a charter school number in the RT accountability field. Our programmers are currently investigating this issue. Please watch for future announcements.
